Campaign to abolish the ABCC

The Rudd Government decided to keep the ABCC till 2010, during the Howard and employer scare campaign before the November election.

The ABCC was formed out of Howard's discredited Cole Royal Commission. It was part of Howard's strategy to undermine the Labor Party. ABCC head John Lloyd openly campaigned for the Liberal Party last year.

Howard's special construction industry laws have been condemned 5 times by the International Labor Organisation for breaching conventions Australia has ratified.

But 150 ABCC enforcers are being employed and \$33 million of our taxes wasted annually, to continue this intimidation of ordinary construction workers.
