

# **AEU Environment Policy**

(as adopted at the 2010 Federal Conference)

## **Position Arising**

### **Mitigation of Climate Change**

The AEU is disappointed with the outcomes of the international processes around climate change such as the recent Copenhagen meeting, because nations have failed to commit to targets and strategies that will significantly reverse climate change.

Recognising that the science is ever evolving, the AEU restates its commitment to lobbying for climate change policy which implements carbon emission reductions in line with the science of the day.
